# ScreenBeam Alert

Real-time alert and notification system for classrooms and meeting spaces

ScreenBeam Alert enables priority interruption of ScreenBeam 1100 Plus and 1000 EDU-enabled displays with alerts and messages. A feature of Enterprise class Central Management System (CMS-E), administrators can interrupt the current use of the receiver to display an urgent message, safety instructions or other important information.

Built around our Award-Winning Wireless Display technology, ScreenBeam Alert is designed to meet safety and security needs of classrooms and meeting spaces. When added to your Emergency Response Program, Alert adds an additional layer of notification and communication throughout your facilities wherever a ScreenBeam receiver is installed.

⚠ **ALERTS**

Fire Drill
Please exit the building calmly and quietly and go to the assigned gathering point.

Every ScreenBeam 1000 EDU includes Central Management System (CMS) software to remotely manage large-scale deployments across multiple locations, saving time and money.

SCREENBEAM ALERTS KEY ADVANTAGES

With just a few clicks, your CMS Enterprise Administrator can interrupt a ScreenBeam session to send an urgent notification, breaking into both digital signage or active presentation, notifying people near the display to be aware or take specific actions.

Quick, Pre-emptive Alerts

Immediately interrupts active presentations to deliver urgent notifications.

Location and Network Specific

Alerts can be sent to any Site, Campus, or group of receivers and across networks.

Customizable Messaging

Messages are fully customizable to match any scenario or notification requirement.

Administrator Control

ScreenBeam Alert is secure in that only authorized CMS-E Administrators have access to send and clear notifications.

Free upgrade available to all CMS-E users with ScreenBeam 1100 Plus and 1000 EDU devices
